Projects

Coffee Shop

This project involves designing and developing the front-end interface of a web-based coffee shop application, allowing customers to browse and order menu items,and explore the different places in the shop.

-

Html, Css, Javascript

Memoria: Your Personal Photo Gallery

"Memoria" is a user-friendly web application designed to provide a secure and convenient platform for users to store and organize their cherished memories in the form of pictures. With the power of React and TypeScript, Memoria offers a seamless and intuitive experience for users to upload, manage, and relive their precious moments

-

React, Typescript, Firebase

Admin Dashboard

Developed a responsive MERN stack admin dashboard with data visualization and cloud deployment.

Proficient in React, Express, Node.js, and MongoDB, focused on high-quality, scalable web solutions.

-

React.js, Node.js, Express.js, MangoDB

Software Development using optimization techniques

This project involves using optimization techniques to develop software that optimize certain parameters, such as code complexity, performance, or optimizing resource allocation, to improve the overall performance of the software development process.

-

Python

Blogging Website

This is a dynamic and user-friendly blogging website developed using the .NET MVC (Model-View-Controller) framework. The project aims to provide a platform for users to create, manage, and share their blogs while offering an engaging and interactive experience for readers. With This website bloggers can express their thoughts, engage with a community, and gain visibility for their content. This is the project that I have done by using ASP.NET MVC
